

EXAM AND SUBMISSION GUIDELINES

1. Submission Guidelines

- **Platform:** GitHub. You must **create a repository** (which can be either public or private) to host your entire project.
- **Repository Link Submission (Moodle):** We highly advise creating your repository early and submitting the link to Moodle immediately. The absolute latest you may submit your link is **June 30th, 12:00 PM (Noon)** to allow us to prepare the automated cloning process. Exactly ONE member from each group must submit the final link to your GitHub repository via Moodle.
- **Final Code Deadline (GitHub):** You may continue pushing code to your repository until **June 30th, 23:59**. We will clone your repositories immediately following this deadline. Any commits pushed after this timestamp will not be considered for grading.
- **Access Requirement:** If you choose to make your repository **private**, you **MUST** invite the teaching team (pnposch, kiraschoenhuetten) as collaborators prior to the deadline so we can clone it.
- **Naming Convention:** Please name your repository clearly, following this exact format: dai-mission-group-A (where "A" is replaced by your group's actual letter).
- **Repository Contents:** Your repository must include the following files:
 - The final Jupyter Notebook. The Jupyter Notebook must be submitted in a fully executed state (all cell outputs and plots visible).
 - A requirements.txt file listing all necessary packages and dependencies to ensure reproducibility.
 - Necessary external modules (if custom functions or classes were outsourced into separate .py files).
 - The PDF file of your presentation slides.
 - Your dataset(s) (subject to the size constraints below).
- **CRITICAL: Data Handling & Size Limits:** GitHub enforces a strict **100 MB** file limit.
 - If your data is under this limit, include it directly in the repository.
 - If your raw data exceeds 100 MB, do NOT attempt to push it to GitHub. Instead, you must include an automated script in your notebook to download the data via API/URL, or provide a secure Sciebo link within your repository (e.g., in a README.md) where the necessary data can be accessed.

2. Presentation Slide Requirements

- **Slide Limit:** Maximum of 5 content slides.
- **Additional Slides:** You may include a Title Page, a Literature/Reference slide, and optional Backup slides.

- **Backup Slides Restriction:** Backup slides must ONLY contain results formatted as tables or figures/diagrams.
- **Required Content:** Your 5 content slides must clearly cover the following core areas:
 - Motivation and Economic Relevance
 - Data and Methodology
 - Results
 - Limitations and Synthesis
- **File Format:** Submission must be in PDF format only. Do NOT submit PPTX files.
- **Note on Presentation Slides:** You will NOT deliver a live presentation. Instead, these slides will be opened and reviewed during your oral exam.

3. Session Scheduling and Slot Selection

- **Thematic Sessions:** Proposals have been grouped into sessions based on their specific themes.
- **Slot Prioritization (Rank Choice):** To ensure a fair distribution, we use a preference-based ranking system. Each **group lead** must rank all available slots within their assigned session in Moodle by **June 18th, 12:00 PM**. You will be notified of your assigned slot shortly thereafter.

4. Oral Examination Structure

- **Context:** Due to the high number of participating groups and strict time constraints, the exam will be conducted as an oral exam (Q&A).
- **Duration:** 15 minutes per group.
- **Rooms:** Morning sessions will take place in room **M811**, while afternoon sessions will be held in room **M827**. Please arrive 10 minutes before your scheduled exam slot.
- **Focus:** The examination will consist of questions regarding your Proposal and your Presentation slides.
- **Individual Accountability:** Each student must be prepared to answer questions specifically related to their individual area of responsibility, as designated in the group's Work Plan in the Jupyter Notebook. *(Note: The same notebook serves as both the proposal and the final submission.)*
- **Grading:** The oral exam serves as a direct validation of your submitted work. Your performance during the Q&A will directly modify (increase or decrease) the base points awarded for your Mission Proposal. Furthermore, while the proposal is a group effort, significant discrepancies in individual performance during the Q&A will lead to differentiated, individual final grades. The presentation slides will serve as the foundation for specific explanations and questions, and they will contribute directly to the evaluation of the "Synthesis & Communication" dimension of your grade.

Time Slot	Session	Groups	Room
08:00 – 10:50	Financial Markets & Corporate Strategy	B, H, J, M, U, W, X, Z	M811
11:00 – 13:00	Labor Economics & Demographics	A, E, N, O, Q, R	M827
13:50 – 15:30	Energy, Climate & Infrastructure	F, G, I, P, T	M827
15:40 – 18:00	Credit Risk, Consumer Behavior & Sports Analytics	C, D, K, L, S, V, Y	M827
